

[Request Assessment](#)

## 1 HCI Assessment

An easy-to-use, online dashboard that will help you get visibility into your IT environment and workloads so that you can identify areas to operate more efficiently and potential cost savings.

A customized report with graphics and calculations providing performance insights and resource requirements.

Access to consult with Nth IT Professionals results that you can securely share with your peers.

## 2 The vSphere Assessment Tool (VSAT)

### JUMP START YOUR VSPHERE UPGRADE

Run an analysis on your vSphere environment including insights into hardware compatibility, and the documentation and next steps that you will need to ensure a successful upgrade.

## 3 Virtual Network Assessment (VNA)

- Network Visibility and Analytics
- East-west traffic analytics for security and micro-segmentation design
- Control and tracking to meet audit and compliance requirements for virtual distributed firewalls
- 360 Overlay-underlay visibility and topology mapping
- Extensive 3rd party physical switch integrations
- VXLAN to VLAN logical path mappings

## 4 vSphere Optimization Assessment

### VMWARE UREALIZE OPERATIONS

Use cases

#### Continuous performance optimization

**Efficient capacity management and planning** – Reduce cost and capacity risk with real-time, predictive capacity analytics, delivering optimal densification and proactive planning.

**Intelligent remediation** – Predict, prevent, and troubleshoot faster

**Integrated Compliance** – Reduce risk and enforce IT and regulatory standards

**Financial Benefits** – Maximize server utilization through proactive workload across clusters, capacity scenario planning and both right sizing and reclaiming excess capacity.
